

CITATION JET PILOTS

CJ Pre purchase recommendations

I just did a purchase 5 months ago. Initially I thought I would just do the basic inspections, after hearing of some horror story's I understood that investing in inspections is smart money, especially with the seller paying for the squawks. I don't think the doc 10 covers everything, but it is a strong good start. I recommend you hire Derrick Schmidt. He can identify what inspections need to be done and then oversee the inspection to make sure everything is properly done.

Delivery Acceptance

Took delivery of a new M2 this past week. Delivery was very smooth as was our first Cessna delivery with a CJ 1+ seven years ago. Many thanks to Derrick Schmidt whose help in the process was very professional and facilitated a successful delivery. I would not have felt comfortable in the process without professional assistance.
